MAYOR CHARLES W. BICKFORD.

Thirteenth Annual Report

OF THE

City of Rochester,

New Hampshire,

FOR THE

Year Ending December 31st,

1904.

PRINTED BY
COURIER PUBLISHING COMPANY,
ROCHESTER, N. H.

INAUGURAL ADDRESS OF MAYOR CHARLES W. BICKFORD.

Gentlemen of the City Council:

Twelve months have elapsed since we took our oath of office to administer the business affairs of the city of Rochester to the best of our ability, and while there is no regular inauguration of a city government today, nor change of administration, or policy to be pursued, there seems to be but very little for me, as chief executive of the city, to say to you.

In taking upon myself the duties of this office, I should be false to my deepest feelings, if I did not at this time acknowledge to you, and through you, to every citizen of Rochester, my profound appreciation for the honor they have conferred upon me for the second time.

I may truly estimate it an honor, inasmuch as I have been twice elected mayor by practically a unanimous vote each year. I am proud as well as grateful for this rare manifestation of confidence on the part of my fellow citizens and I cheerfully assume the office and perplexing responsibilities with a firm and steadfast resolution to do my utmost to subserve the welfare of this, my native city, knowing well I have your hearty co-operation pertaining to the best interests of all our citizens.

Whatever success we may have achieved during the past year is due in no small measure to your united efforts in behalf of the city, and it is to your credit, as well as your predecessors', that the spirit of "graft," so largely manifest now in our municipalities, is an unknown factor here, and it is a fact worthy of being spread upon the city records. The real cause

of the present looseness in the administration of city affairs throughout the country is that we are too occupied with our own private matters to devote the time to the office; and in order to accept office, it must be a personal sacrifice, actuated by the proper spirit and willingness in the cause of good government and the well being of the community, to accept this obligation, and few people know or appreciate how much time and active work are given by these public spirited citizens in caring for your interests and mine, save the members themselves, and I must say the city is fortunate in securing the service of such busy men, but that is the unique condition of our city council and the sequel to Rochester's good name.

It is not my purpose, nor is it necessary to call your attention to the condition of the various departments, because in a short time a complete statement will be before you for inspection and consideration. I will only touch upon a few of the leading ones, which I consider the most important and at the same time suggest such remedies as I think for the best interests of the city. With this in view, I shall present to you the financial condition of the city Jan. 1st. 1905, as follows:

Liabilities:	
Outstanding water bonds,	\$190,000 00
Outstanding notes,	126,007 00
Sewer bonds,	78,000 00
<hr/>	
Present indebtedness, not including water bonds,	\$204,007 00
Assets:	
Amount due on J. B. Stevens' list,	\$19,002 03
Boston & Maine R. R. stock,	800 00
Cash in treasurer's hands exclusive of money belonging to water department and library,	13,272 26
<hr/>	
	\$33,074 29
<hr/>	
Leaves net debt,	\$170,932 71

The water bonds are not reckoned a part of the city debt and from present indications the city will never be called upon to pay one dollar.

They will be retired in due time from the earnings of the water department. A surplus leads to bad legislation sometimes, so the finance committee decided last spring to retire \$10,000.00 of the water bonds from the un-invested surplus and to continue doing so each year. Our first problem of 1905 will be that of the annual appropriations. I believe that certain increased amounts will be asked for by some of the departments, particularly schools and highways.

While I realize the increasing demands of our growing city, I believe that we ought to appropriate such sums as will give the city a progressive business administration without increasing our present tax rate.

HIGHWAYS.

Rochester has achieved the unenviable distinction of having the poorest piece of highway in the state, between this city and Dover, since automobiling has become so common, and our fame as its owner has extended beyond New England, through the New Mount Washington Hotel folder, circulated in all the hotels and railroad offices of the country the past season, giving the direct route from New York to Boston and Boston to the White Mountains, passing through and stopping over night at Rochester, being half way to Bretton Woods. This blot on our city should receive the early attention of the highway committee and something done of a permanent character to satisfy the traveling public. It would seem to be wise to raise money enough to put this piece of highway in good condition, and if necessary, to hire a competent road builder to superintend the work. It could be done at a small expense by crowning the road bed and putting on a coat of clay, which is near at hand along that section. Good results have been obtained in other places with the same sandy formation, to my personal knowledge, and I would like to see it tried here. We have 150 miles of roads to maintain in this city and \$10,500.00 to do it with,

which sum is very misleading, when I tell you from that sum was expended \$3,500.00, trying to keep the roads and streets passable on account of snow. One thousand four hundred and twenty-three dollars was paid out for land damages, on account of widening streets, most of that sum coming over from last year, and \$1,366.00 for the new bridge across the Salmon Falls river at Walnut grove. These several sums all coming out of the highway appropriation, leaving less than \$4,500.00 to be expended on roads, an average of \$30.00 per mile, barely enough to pick the stones and cut the bushes. Land damages and new bridges of a permanent character should be provided for by special appropriation, and not allow the highways to suffer and give our citizens cause to complain. Good roads benefit all our people and the highway committee should have at least a modest appropriation to maintain them.

Now that the city stable is nearly complete, the committee should purchase another pair of horses for use of the fire department and work about the city.

The inauguration, this year, of the city teams collecting ashes and rubbish within the fire precinct, has met with hearty approval and should be continued and extended, for nothing is more attractive than well kept streets.

PARKS AND COMMONS.

These have received some attention the past year. Woodman square has been curbed ready for a concrete sidewalk to be put down in the spring, and the lawn will be properly graded and the finishing touches applied at an early date. Sixty-five trees were set out around the common and extended to the cemetery. It needs to be plowed, fertilized, harrowed, seeded and rolled; walks outlined and graded.

Cities generally reflect the taste, customs and intellectual desires of their inhabitants, and Rochester is a conspicuous illustration of the rule. Our parks should be made attractive and beautiful.

NEW BUILDINGS.

This year will mark the opening of new homes for two public institutions, the new fire station and the public library, the gift of Andrew Carnegie. The fire station is a two story, with basement, building 56 by 60 with apparatus room for three companies, commodious and modern, equipped with stabling for eight horses. It will be completed in a few days and open for inspection, when I hope every citizen of Rochester will avail himself of the opportunity of looking it over, and I think you will agree with us, the city ought to be proud of its new station. The new library will be completed March 1st, opened for inspection and dedicated during the month. The library trustees contemplate moving about April 1st. The building is semi-fireproof construction, two stories with fine basement and a capacity of 40,000 volumes. A full description has already been made in the papers and is not necessary at this time. The building will be an ornament to the city and appreciated by the public when finished.

After careful investigation, I concur with some of my predecessors as to the needs of a new city hall, with suitable offices for all departments, fire and burglar proof repository for our city records.

Records have already been destroyed which cannot be replaced at any price, and if a fire should occur any time within the year, we could not help losing most of our valuable records. I urge upon you the necessity of giving this matter your careful attention, and I recommend the selection of a committee to procure plans, specifications and estimates as to probable cost of such a building. I am informed on good authority that such a building as we require and large enough to contain all the city offices, fire proof vaults, police station and police court room and all other necessary offices, with a hall large enough to seat 1,000 to 1,200 people, would cost from \$50,000 to \$65,000 dollars, according to style and finish, and I would suggest issuing bonds covering a period of fifty years at a low rate of interest and retiring a certain amount each year,

the same as our sewer bonds, and let posterity take care of the rest and we would show a wise progression and benefit all our people without increasing our tax rate. This is a matter for your careful consideration and to be taken up later.

In conclusion, gentlemen, the nearer we can approach the rules and principles of a business corporation, the better our conditions will be. We are not a legislative body. We are essentially an executive body. Therein lies our power to accomplish much or little. The success of any administration is determined not in open session, but in conscientious and painstaking committee work. Accordingly, I have made up my committees solely to the end that every measure shall receive the most careful scrutiny. I shall rely upon you all to make our year's work pleasant and the same cordial co-operation as in the past. Let us each, then, give our best attention and efforts to our duties for the ensuing year, and when we have fulfilled our part, I hope it may be said of us that we did the best we could and we will have the self gratification of being true to our oath and faithful public servants. In closing, I desire to return my sincere thanks to each and every member of the council for your kindness, courtesy and co-operation during the past year, also to the city clerk and city solicitor. I am deeply grateful for your watchful care and advice. Again thanking you all, I am ready to take up, with you, our year's work.

CITY GOVERNMENT

As Organized Jan. 4, 1905.

MAYOR, CHARLES W. BICKFORD.

Councilmen.

<i>Ward One</i>	{ JOSEPH O. HAYES, GEORGE A. ELLIOTT, JOEL W. MCCRILLIS.

Recommendation of Finance Committee for Annual Appropriation.

We, the committee on finance, having considered the amount necessary for the maintenance of the several departments for the ensuing year, recommend the following amounts be appropriated for their support:

Fire Department,	\$ 3,300 00
Salaries,	4,500 00
Highways,	10,500 00
Sidewalks,	1,492 56
Macadam,	400 00
Miscellaneous department,	1,300 00
Sampson Post, G. A. R.,	150 00
East Rochester Library and Reading Room,	200 00
Street lights,	6,600 00
City Poor and Soldiers' Aid,	1,200 00
Free Public Library and Reading Room,	1,500 00
Sewer bonds,	6,500 00
Interest on sewer bonds,	2,530 00
Schools,	21,000 00
Health department,	200 00
County tax,	12,427 44
Parks and commons,	200 00
High School building,	6,000 00
Total,	\$80,000 00

IMPORTANT RESOLUTIONS AND ORDERS PASSED BY THE CITY COUNCIL.

Resolution for Annual Appropriation.

Resolved by the City Council of the City of Rochester :

That, for the support of the various departments for the ensuing year, there be raised by taxation the sum of eighty thousand dollars, (\$80,000.00) and the assessors are hereby directed to assess that amount with such overlay as may be thought necessary. The interest on notes is provided for by the amount coming from the state.

Passed January 16th, 1904.

Resolution Accepting Gift of Hon. Andrew Carnegie for Free Public Library.

Whereas the Hon. Andrew Carnegie of New York has generously donated the sum of seventeen thousand five hundred dollars for the purpose of establishing a Free Public Library in this city, and *whereas*, such action meets the approval of all our citizens, therefore be it

RESOLVED, That the Mayor and City Council accept the donation with the conditions to the same attached.

RESOLVED, That the thanks of the city are hereby tendered Mr. Carnegie for his magnificent gift.

RESOLVED, That the Mayor be, and is hereby instructed to cause the foregoing preamble and resolutions to be properly engrossed and signed by the Mayor, City Clerk and members of City Council and a copy forwarded to Mr. Carnegie; also

that the above shall be made a part of the permanent records of this city.

Passed January 6, 1904.

Resolution for Printing Reports.

Resolved by the City Council of the City of Rochester :

That the clerk is hereby instructed to prepare for the press as soon as possible, the matter that is to go into the report of 1903, and that bids for printing of the same be submitted to such printers as may be designated by the committee on printing, and that for distribution there be printed 1,200 copies.

Passed January 16th, 1904.

An Amendment to Chapter XXIII of the General Ordinances.

Be it ordained by the City of Rochester as follows :

Chapter XXIII, Section 1, paragraph 3, of the general ordinances of the city of Rochester be amended by striking out the word one in second line, and inserting the word three in place thereof, and by striking out the words six and fifty in third line, and inserting the word seven in place thereof.

So that said paragraph as amended shall read as follows :

The City Clerk for his services as Clerk of the Committee on Water Works three hundred and fifty dollars, and for all other services seven hundred dollars.

That paragraph X be amended by striking out the words one and fifty from second line, and inserting in the place of word one the word two, so the paragraph as amended shall read as follows :

The City Physician, including his services as member of the board of health, two hundred dollars.

Passed February 2d, 1904.

Resolution to Hire Money fo Refund Notes Outstanding Against City.

*Resolved by the Mayor and City Council of the City of
Rochester :*

That the Mayor, City Treasurer, and City Clerk be authorized to hire on notes of said city an amount not exceeding fifty thousand dollars, for the purpose of refunding notes now outstanding against said city, as called for.

Rochester, N. H., Feb. 2d, 1904.

Passed Feb. 2d, 1904.

Resolution to Muzzle Dogs of Mary E. Warburton and Edward Crotty.

*Resolved by the Mayor and City Council of the City of
Rochester :*

That the bull dog owned or kept by Edward Crotty, one large red and white St. Bernard dog, and one brown and black mongrel dog belonging to Mary E. Warburton, of said Rochester, and kept within said city of Rochester, shall be muzzled for the period of one year.

That two certified copies of such order, certified to by the City Clerk, shall be posted in two public places of said city, and one like copy shall be served upon said Edward Crotty and Mary E. Warburton, or left at their usual place of abode, and that the warrant of said Mayor and Council shall issue at once to kill such dogs if not so muzzled.

Passed March 1st, 1904.

Resolutions to Purchase Water Bonds.

Resolved by the Mayor and City Council of the City of Rochester :

That the committee on finance are hereby authorized to purchase water bonds of the city of Rochester from the funds in said city to the credit of said water department, providing they can do so to the advantage of said city. Said bonds and the coupons attached thereto, when purchased and redeemed by said finance committee, shall be cancelled by the Treasurer of said city in the presence of said finance committee, and a record of the same shall be made in the water bond book of said city and signed by the City Clerk, City Treasurer, and by said Finance Committee, showing the number of bonds with their coupons attached, purchased, and their numbers when cancelled. Said bonds when so cancelled shall be kept by the City Clerk.

Passed March 1st, 1904.

Resolution to Appoint Committee to Receive Plans for a Public Library.

Resolved by the City Council of the City of Rochester :

That the Mayor appoint a committee of two from the City Council to act with a committee of two from the Trustees of the Public Library, the Mayor to be chairman of said joint committee, and said committee is authorized to receive plans and estimates for a new public library.

Passed March 1st, 1904.

Resolutions for Committee to Build a Fire Station.

Resolved by the City Council of the City of Rochester :

That the Mayor with a committee of two to be appointed by him, be a committee to build a new fire station in accordance with vote of City Council Feb. 3, 1903, from plans selected, made by William R. Walker & Son, with such changes as said committee may deem advisable.

Said committee is authorized to make any contracts necessary to carry this resolution into effect.

Passed March 1st, 1904.

Resolution to Purchase a Horse for Use of Water Department.

Resolved That the committee on Water Works be authorized and empowered to purchase a horse for use of Water Works, from any funds in that department, at a price not exceeding two hundred dollars.

Passed April 5, 1904.

Resolution to Remove Ashes and Rubbish.

Resolved by the City Council :

That the Highway Department are hereby authorized and empowered to collect the ashes and rubbish within the fire precinct of the city, weekly, until Dec. 1, 1904, provided that the house holder shall place said ashes and rubbish in separate receptacles on the edge of the sidewalk.

Passed April 5, 1904.

Resolution to Accept Additional Gift from Mr. Carnegie.

To the Mayor and City Council of the City of Rochester :

Whereas the Honorable Andrew Carnegie has donated an additional sum of twenty-five hundred dollars (\$2,500) toward building a free public library building on the same conditions as the \$17,500. Therefore be it

RESOLVED that the city accept the same on those conditions, and the City Clerk is hereby instructed to return the thanks of the city to Mr. Carnegie for the same.

Passed April 5, 1904.

Resolution to Purchase Water Pipe to Lay In Church Street, Gonic.

Resolved by the City Council of the City of Rochester :

That the purchasing committee is hereby instructed to purchase four hundred feet of six-inch cast iron pipe for the water department, and the money necessary for payment of same shall be taken from the earnings of the water works for year 1904: and the committee on water works are authorized to have said pipe laid in Church street in Gonic village.

Passed June 7, 1904.

Resolution to Build 200 Feet Sewer at East Rochester.

Resolved by the City Council of the City of Rochester :

That the Committee on Water Works and Sewers be authorized and empowered to build about two hundred feet of sewer on Abbott street, East Rochester, and that the same be paid for from any money now to the credit of that department.

Passed Sept. 6, 1904.

Resolution to Agree with Perkins, Linscott & Co., Regarding Sewer.

Resolved by the Mayor and City Council of the City of Rochester :

That in consideration of Perkins, Linscott & Co. giving up any rights they may have to the old way into their shoe shop and accepting the new right of way by land of Mrs. Hodgdon, from Wakefield street to the Boston & Maine railroad, that the Mayor is authorized and instructed to enter into an agreement with Perkins, Linscott & Co., whereby they may have the right to repair and relay their sewer running from their shoe shop to said Wakefield street across the schoolhouse grounds, reserving to said city the right to take up said pipe and lay it in the new driveway.

Rochester, Sept. 6, 1904.

Passed Sept. 6, 1904.

Resolution to Purchase Land at Meaderboro.

Resolved by the Mayor and City Council :

That the city buy a piece of land of John Q. Abbott and Victoria Morrell at Meaderboro Corner for highway purposes being $\frac{4+4}{100}$ of an acre, and the Mayor may purchase the same and take deeds thereof to the city.

Passed Oct. 4, 1904.

Resolution to Revise City Ordinances.

Resolved by the Mayor and City Council of the City of Rochester :

That the Committee on Legal Affairs be instructed to revise the city ordinances so as to include the amendments heretofore made and any proposed amendments and report the same to the City Council in order that the same may be revised and printed in the forthcoming city report.

Passed Nov. 14, 1904.

Resolution to Transfer Money from One Department to Another.

Resolved by the City Council of the City of Rochester.

That if found necessary in closing the accounts for the year to transfer from any department where there may be a surplus to any other department that may be overdrawn, the committee on finance are hereby authorized to make such transfer.

Rochester, December 8, 1904.

Passed December 8, 1904.

Resolution to Abate Water for Gafney Home.

Resolved by the City Council of the City of Rochester.

That the Clerk of the Water Committee be authorized and instructed to abate the water rate on the aqueduct water used by the Gafney Home for the Aged until further instructions.

Rochester, December 6, 1904.

Passed December 8, 1904.

REPORT OF SUPERINTENDENT OF WATER WORKS,

For the Year Ending December 31st, 1904.

To the Water Board and City Council of the City of Rochester :

GENTLEMEN:—I herewith submit my thirteenth annual report.

Number new services put in during the year,	25
" to date,	1,323
old " relaid with new pipe,	46
feet $\frac{3}{4}$ inch service pipe laid,	3,681
1 " "	858
main pipe laid this year,	
1 inch, High St., laid this year,	250
1 inch, Walnut St., " "	404
1 inch, Cleveland St., " "	200
1 inch, Winter St., " "	270
1 inch, North St., " "	325
6 inch, Church St., Gonic, laid this	
year,	390
main pipe to date,	135,560
gates put in during the year, 6 inch,	1
repaired " "	5
hydrants put in " "	1
repaired " "	6
to date,	170
leaks repaired during the year.	7
meters put in " "	23
in use to date,	65

The number of meters put in this year ought to be largely increased the coming year.

I would recommend the installation of meters on all large services the coming season.

Notwithstanding the severe drouth the last half of the year we have had an abundance of good water.

All of which I respectfully submit,

L. P. PICKERING,

Superintendent.

REPORT OF THE SUPERINTENDENT OF SEWERS,

For the Year Ending December 31st, 1904.

Number sewer connections put in this year,	42
“ to date,	836
Number feet of main pipe laid this year,	
Number feet 8-inch, Abbott St., East Rochester,	285
Number feet main pipe to date,	86,858

Respectfully submitted,

L. P. PICKERING,

Superintendent.

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT.

To the Mayor and City Council of Rochester, N. H. :

I herewith submit my annual report of Fire Department, for the year ending Dec. 31st, 1904.

Whole number of fires 23 ; 18 in the city proper, 1 at Gonic, 1 at Farmington road, 1 at East Rochester, 1 at Salmon Falls road, and 1 at North Rochester.

We have had 6 still alarms, have purchased 1 hose wagon for A. D. Whitehouse Hose Co. at Gonic, which was greatly needed, and have most completed our Central station.

The amount of property involved in fires for 1904 is as follows : Valuation of buildings, \$21,635 ; insurance on same, \$11,295 ; paid, \$7,626 ; contents valuation, \$6,300 ; insurance, \$1,150 ; paid, \$1,075.

I would again recommend the purchasing of a combination chemical which would be a great benefit where the hydrants could not be used and especially at fires in the farming districts, also at brush fires. I recommended in my last report the addition of four fire alarm boxes, which are greatly needed.

Thanking the Board of Engineers, also the officers and members of the fire department for their prompt discharge of all duties, I submit my annual report.

GEO. H. WEBSTER,

Chief Engineer.

ROCHESTER, N. H., Jan. 4, 1905.

Location of Fire Alarm Boxes.

- | | |
|-----|---|
| No. | |
| 16 | North Main street, corner Bridge street. |
| 17 | Main street, corner Congress street. |
| 21 | River street, corner Lafayette street. |
| 23 | Waldron avenue, corner Chestnut street. |
| 25 | North Main street, near Fairbanks & Rawson's store. |
| 27 | North Main street, near S. H. Burnham's. |
| 31 | Wakefield street, near high school house. |
| 33 | Hanson street, near Wrisley house. |
| 34 | Summer street, near Mrs. Roberts' stone house. |
| 35 | Portland street, near Foss' store. |
| 37 | Silver street, near electric light station. |
| 41 | South Main street, near Wallaces' shop. |
| 43 | Upham street, near school house. |
| 47 | Car barn, foot of Charles street. |
| 52 | Charles street, corner May street. |
| 54 | Charles street, corner Woodman street. |

Instructions to Citizens.

1. Upon the discovery of a fire, notice should be immediately communicated to the nearest alarm box, the keys to which are in the hands of all regular police, and in boxes near each alarm box.

2. Upon the discovery of a fire, or positive information of a fire, break the glass in the key box, unlock the box, pull down the hook once as far as it will go (without jerking), and then let go. Shut the door, but do not try to remove the key, as it is locked in a trap lock and can only be removed by a release key, which is carried by each engineer, who will, as soon as convenient, release and return it.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; and if you still hear no clicking go to the nearest box, procure a key, and give an alarm from that.

4. **Never pull an alarm for a fire seen at a distance.**

Never touch a box except to give an alarm of fire.

Give an alarm for no cause other than actual fire.

Don't give an alarm for a chimney fire.

5. Owners and occupants of buildings are requested to inform themselves of the location of alarm boxes near their property. Be sure the alarm is promptly and properly given.

Signals.

Two strokes of the bell is the all-out signal.

Six strokes of the bell is for a brush fire, or a fire at a distance, where the fire department will be needed.

One stroke of the bell is the engineer's test.

The above signals are given only by the chief engineer.

REPORT OF OVERSEER OF POOR.

To the Mayor and City Council of the City of Rochester, N. H. :

Following is a list of those receiving aid and the amount furnished each applicant for the year ending Dec. 31, 1904.

SHERWOOD W. GOODWIN,

Board of Health.

REPORT OF CITY MARSHAL.

To the Honorable Mayor and City Council :

GENTLEMEN :—I have the honor to submit the following report of the police department for the year ending December 31, 1904 :

The police department consisted of the following officers :

C. A. Allen, *Marshal*.

A. F. Wilkinson, *Assistant Marshal*.

Ferdinand Sylvain.

ARRESTS :

Number arrests,		311
Drunks,	249	
Adultery,	1	
Assault,	15	
Indecent Conduct,	3	
Fast driving of auto,	1	
Keeping for sale without a license,	5	
Bastardy,	1	
Indecent exposure,	1	
Interference with officer,	1	
Larceny,	17	
Breaking machine,	2	
Murder,	1	
Open on Lord's day,	4	
Obtaining liquor for posted men,	2	
Break and entering,	3	
Disturbing peace,	3	
Begging,	2	

311

DISPOSED OF AS FOLLOWS :

Settled,	60
Appealed,	14
Committed to jail,	15
Committed to the house of correction,	31
Discharged,	9
Suspended,	23
Promised to leave town,	80
Promised to pay,	76
Put on file,	1
Quashed,	2
	<hr/>
	311
Number of doors unlocked,	5
Number of lodgers,	480
Amount of fines and fees collected by city marshal,	\$923 50
Expenses,	64 05
	<hr/>
	\$859 45

In addition to the cases enumerated, service for the year has included the investigation of many matters that have not been brought before the court, attending to many complaints and the devoting of much time in the effort to preserve order, to protect and enforce law in the punishment of offenders.

I am pleased to say that every officer under my command has been prompt and efficient in the discharge of his duty.

Respectfully submitted,

C. A. ALLEN,

City Marshal.

REPORT OF CLERK OF POLICE COURT.

To the Honorable Mayor and City Council:

I hereby submit the following report for the year ending December 31st, 1904.

There have been entered on the police court civil docket 15 cases, and on the criminal docket 311 cases, for the following offences:

Obscene language,	3
Keeping spirituous liquors for sale,	2
Keeping cider for sale,	2
Selling spirituous liquors,	1
Fast driving of automobile,	1

311

DISPOSED OF AS FOLLOWS :

Settled,	60
Appealed,	7
Bound over,	7
Committed to jail,	15
Committed to house of correction,	31
Discharged,	8
Sentence suspended,	103
Promised to pay,	76
Placed on file,	1
Disclosed,	1
Quashed,	2
	<hr/>
	311

I have received for writ blanks and entries in suit cases and for copies, etc., from the superior court, \$23.67, and have paid the same to the city treasurer.

HENRY F. WALKER,

Clerk.

ROCHESTER, N. H., Jan. 1, 1905.

REPORT OF TREE WARDEN.

To the Honorable Mayor and Council:

I herewith submit my report as tree warden for the year ending Dec. 31st, 1904.

There have been sixty-five trees planted.

I have trimmed trees on a number of streets.

I have been called on by the telephone and electric light companies in regard to locating guys and trimming along the lines.

SHERWOOD W. GOODWIN,

Tree Warden.

REPORT OF STREET COMMISSIONER.

To the Honorable Mayor and Council of the City of Rochester :

GENTLEMEN :—I have the honor to submit herewith the report of the highway department for the year ending December 31, 1904.

Among the permanent improvements we have made this year is the macadamizing of one-third of a mile of the new road to East Rochester. This work required 600 loads of cobble stone, 218 loads of crushed stone, and 125 loads of gravel that were all well rolled by the use of the steam roller. The new abutment and one-half of the bridge at the Berwick line of the Salmon Falls river, has been constructed this year. Much work has been done at Horse hill. With the material that was excavated from the top of the hill, quite a large fill was made at the bottom, which was necessary, and much permanent work has been done on the road leading from Meaderboro toward Gonic, by blasting stone and widening the road, also much of this work was done on the Barrington road.

Number of days' service cutting bushes, 150; number of days' service with road machine in road building about the city and outskirts, 35.

Sidewalks.

385 yards of artificial stone sidewalk.

600 " brick sidewalk.

456 feet of edging has been set around Woodman park.

1,000 " " on Main and Wakefield streets.

500 " on hand.

Two hundred and fifty loads of cinders used for grading sidewalks in various parts of the city.

A new feature of the work has been the collection and removal of rubbish from the fire precinct, which has been much appreciated by the general public.

Respectfully submitted,

GEO. T. McDUFFEE,

Street Commissioner.

REPORT OF THE TREASURER OF THE CITY OF ROCHESTER

For Year Ending Dec. 31, 1904.

REPORT OF TRUSTEES

OF THE

Rochester Public Library,

1904.

At a meeting of the trustees of the Rochester Public Library, Dec. 30th, 1904, it was voted that the report of the secretary, librarian and treasurer be presented to the city council as the annual report of the trustees for the year 1904.

REPORT OF LIBRARY TRUSTEES.

To the Honorable Council of the City of Rochester :

GENTLEMEN :—I have the honor to present the eleventh annual report of the trustees of the public library, also the treasurer's and librarian's report, giving in detail the work of the library during the past year, and such recommendations as may be deemed necessary for the successful operation of the same during the coming year.

In our last report we had reached the limit for room to properly conduct the work of the library and reading room. Through the efforts of the Hon. Osmon B. Warren, the Hon. Andrew Carnegie made a gift to the city of Rochester of \$17,500.00 for the purpose of erecting a library building in Rochester, on condition that the city appropriate annually \$1,750.00 to maintain the same.

This amount was not considered sufficient to build such a structure as the trustees believed was necessary for the work of the library, and through the efforts of the mayor and council, who presented to Mr. Carnegie more fully the needs of the library requiring a larger building, Mr. Carnegie was induced to make the gift \$20,000.00, on condition that the city appropriate annually \$2,000.00 to maintain the same.

The gift of Mr. Carnegie having been accepted by the city, it is with pride and pleasure the trustees are looking forward to the occupancy of the attractive and commodious building. But it is the opinion of the trustees that the sum of \$2,000.00 will not be sufficient to maintain the same. The city has appropriated annually \$1,500.00 for the support of the library in its present quarters. They have also provided a janitor, water, light and heat. • In the new building, the cost of light, heat,

water and janitor and other minor expenses will be incurred. In view of this fact, the trustees ask the honorable council to take into consideration the needs of the library under the new conditions and make the appropriations not less than \$2,500.00 per annum.

During the past year only \$147.74 was expended for new books. Some patrons of the library have found fault because new books were not purchased. But the trustees have felt justified in not buying new books for the reason that there is not shelf room in our present quarters and in view of the fact that additional furnishings will be necessary for the new rooms. For this purpose we carry a balance of \$376.13.

The library has been of great benefit to the literary clubs and other organizations in our city in supplying reference books and other helps in their work; also our schools have been assisted in their work from the use of library books. We would suggest that these organizations plan to assist in furnishing the rooms of the new building. Or better still, if some friend of the library would donate a sum for this purpose, it would be appreciated by the trustees.

It is gratifying to note the continual increase in circulation, 2,173 more volumes and 531 more periodicals than last year.

It is the desire of the trustees that the new year, beginning with such favorable circumstances, receive the support of the patrons as well as the officials of our city, and that no departments of our work weaken for the want of proper support. The trustees appreciate the efforts of the librarian and assistants in their attention to the wants of the patrons of the library.

JOHN YOUNG,

Secretary.

ROCHESTER, N. H., Dec. 30th, 1904.

To the Board of Trustees of the Rochester Public Library:

GENTLEMEN:—Into the lives of institutions as well as individuals there sometimes comes a period when the proper thing to do is to halt for a little and while remaining in position put themselves into shape for a more strenuous life.

The year 1904 has been just such a period with the library and while we cannot tell you of great things which have been done the work of the year has been faithfully carried on as results will prove.

Early the wish was expressed by the trustees to go through the year with as little expense as possible in order that the new home might have satisfactory furnishing and equipment. The attempt to carry out this wish has had the hearty co-operation of the library staff and the support of the public, in the kindly way in which it has received the usual reply to a demand for a new book.

We have added during the year, 155 volumes by purchase, 39 by gift and 39 by the binding of magazines. Two volumes have been injured and replaced and 13 volumes discarded because unfit for use, making the entire number of volumes in the library at the present time, 9,615.

The number of new borrowers at Gonic is 43; at East Rochester, 44; at the central library, 169; total, 256. Entire number of people holding library cards, 4,350.

The general work of the library has gone on in much the same manner as usual. 32,271 volumes have been given out during 1904, 2,173 more than last year.

The largest number given out any one day, 367

The smallest number, 32

The number of weekly and monthly periodicals circulated is 1,595—531 more than last year. As soon as a new magazine is put on the table, the old one is taken off and put into circulation. That this meets with favor among the people is shown by the steady increase in the number circulated and the anxiety with which they are awaited. None of the magazines have yet been so badly worn that they could not be bound and but one or two

have ever been lost. Occasionally one has been taken from the reading tables and never returned.

The teachers use the library for assistance in their school work to some extent, although the demand has not been quite as large this year as last. We have issued 399 books for school work.

At the stations the work is carried on in a conscientious manner and all reports and exchanges of books promptly made.

The attendance in the reading room has fallen off somewhat, the number of readers being 5,963, 163 less than last year. Still it is hard to know wherein the difference has been, for as heretofore some days the room is crowded to overflowing and at other times there is hardly a reader. The largest number of readers any one day is 76.

One of the interesting things to note is the increasing interest among children, little folks, hardly able to write their names, are our most enthusiastic borrowers and the children as a whole would put to shame many an older reader, not only by the class of reading which they take out, but by their adaptation to circumstances and kindly treatment of books. We are anxiously looking forward to the time when they can have not only better accommodations but more personal attention paid to their wants.

Still the wear and tear goes on and it is only by unceasing vigilance and unending patching and mending that so few books are discarded.

While we do not think of any new features in the year's work and cannot tell you of any great advancement we feel sure that the library has held its position and after all it is the unrecorded events of daily life which really fixes our place in the order of things.

I wish at this time to thank all who have assisted me in the work of the year and to gratefully acknowledge the kindness of the Trustees.

Respectfully submitted,

LILLIAN E. PARSHLEY,

December 30, 1904.

ROCHESTER, N. H., Dec. 30, 1904.

REPORT OF CITY SOLICITOR.

To the Mayor and City Council of the City of Rochester :

GENTLEMEN :—"Sentence suspended", how often we wonder at this as we read it in the daily print. Is it because mercy so tempers justice that it is so often invoked, or is it because the local magistrate is at his wits ends to know what to do? Quite frequently sentence is suspended upon condition that the prisoner leave town. This simply throws the culprit on some other community to look after, and in no way serves the object desired, punishment of the offender for his own good and protection to the rest of the community. Have not other communities any rights which we are bound to respect, or have we not rights which other communities ought to respect? When the larger cities like New York get to sending their petty criminals into the country to get rid of them it is about time that legislation be enacted to prevent all such deportations. Any present plan now before the legislature looking to their profitable employment should receive the hearty support of our delegation. If there are not enough of them to have a county work house let us have a state institution where they can be reformed and the community be protected.

That we have an able and efficient board of License Commissioners goes without the saying, and their hands ought to be upheld by the officers and the community. If we are to have a license law let us have an honest one, rightly enforced. The Judges of our Superior Court say that the law preventing the illegal sale of intoxicating liquors has teeth in it and they propose to enforce it upon cases brought before them.

Jail sentences will have a great deal more effect than any

fine. If there is a healthy public sentiment in any community it generally gets what it wants.

The services of a solicitor may be of value in preventing litigation as well as in defending actions at law and bringing suits, and in fact, modern methods of doing business, require him before rather than after the business is transacted.

We shall be pleased to render any service to any member of the city government at any time.

Respectfully submitted,

SAMUEL D. FELKER,

City Solicitor.

ROCHESTER, N. H., January 3, 1905.

Agreement Between D., S. & R. Street Railway and the City of Rochester.

This AGREEMENT made by and between the City of Rochester, a municipal corporation duly established under the laws of said State, Party of the First Part, and the Dover, Somersworth & Rochester Street Railway Company, a corporation duly established under the laws of said State and having its place of business at said Dover, Parties of the Second Part, WITNESSETH.

That the said City, in consideration of the agreements and promises made by said Company, as hereinafter stated, agrees to permit said Company to construct its road-bed and lay its tracks along the highways of said City, subject to certain restrictions and limitations according to the lay-outs made by the Council of said City and to be recorded in the records of said City; and the said agreement shall not give to said Company any more extensive rights and privileges than is granted to them by said lay-out and charter and said City may require said Railroad Company to change the tracks and the lay-outs of said road.

The said Company, in consideration of the foregoing promises and agreement made by said City, for itself, its successors and assigns, agrees and covenants to leave said highways in as good repair as they now are, and when said City shall make repairs and improvements upon the same, putting in paving, concrete or macadam, said Company agrees to make the same repairs and improvements on that part of the highways which they are by law bound to keep in repair. Said Company agrees not to plow out the snow from their tracks in such a

manner as to impede the public travel on said highways, and to remove said snow upon notice, and in case of their failure to do so in a reasonable time to reimburse the city for all costs it may suffer in removing said snow, the city to have the right it now has to remove by snow plow, or otherwise, the snow from the side-walks of said City, and if it is at more expense by reason of the tracks of said Company in removing said snow from said side-walks, then said Company agrees to reimburse the city the extra cost to which it is so put. Said Company on or before January 15th, 1902, agrees to construct an iron bridge with stone abutments and a stone pier both laid in cement over the Coheco River near the Gonic Manufacturing Company's Mills in Gonic Village to take the place of the bridge now there, said iron bridge to have a road-bed thirty (30) feet in width with a sidewalk six (6) feet wide on each side of said road-way, making a total width of the road-way and sidewalks of forty-two feet (42) feet. The City of Rochester agrees to pay Two Thousand (2000) Dollars towards the construction of said bridge upon its completion and said Railway Company agrees on or before said date to remove all stone or other obstruction which it may place in or near the waters of said river in strengthening and preparing for temporary use, until said date, the bridge now existing over said river at said place. Said Company further agrees to bear all additional expense that may come to said city by reason of its tracks being placed upon said highways.

The said Railroad Company further agrees to build all fences along by said highway that are necessary to be built in taking the land from said land owners, as agreed between the Railroad Company and land owners, or to otherwise satisfy such land owners. It agrees to put up two iron poles in the place of wooden ones on Central Square in Rochester Village, near the Parson Main Monument, to widen and clear out the highway from rocks and dirt near Allen Twombly's, to pay all damages which may be occasioned to land owners by reason of raising or lowering the grade of the highways for the benefit of said

Railroad, and to keep the grade of said highway at its present grade, unless otherwise changed by an agreement of the City government. Said Railroad Company shall have the right to adjust or defend all such claims for damages. Said Railroad Company shall use the best approved material in building said road, including girder rail on Main Street in Rochester Village and on such other streets as the City from time to time shall build, with such material as said City may deem to require girder rails. Georgia Pine poles sawed square edge and painted shall be placed on Main Street and Wakefield Street in Rochester Village, and straight and painted poles on other streets in the villages of Gonic and Rochester, and whenever said poles are replaced, they shall be of material such as the City may approve. Said Railroad Company shall keep its rails properly bonded with the latest improved devices for that purpose.

Witness our hands and seals this tenth day of December, 1901.

CITY OF ROCHESTER, N. H.,

By H. L. Worcester, Mayor.

DOVER, SOMERSWORTH & ROCHESTER STREET
RAILWAY COMPANY,

By Chas. H. Tenney, Vice President.

ANNUAL REPORT
OF THE
SCHOOL BOARD

OF THE
City of Rochester,
New Hampshire,

FOR THE
Year Ending December 31st,
1904.

At a meeting of the School Board of Rochester, the Superintendent of Schools read his report for the year ending Dec. 31, 1904. This report was accepted and adopted as the report of the School Board to the City Council, and to the public.

E. L. SILVER, Secretary.

ROCHESTER, N. H.

SCHOOL BOARD, CITY OF ROCHESTER.

Organization for 1904.

Hon. Chas. W. Bickford,
Ernest L. Silver,

President.
Secretary.

Ward One--John A. Allen, John I. Rankin.

Ward Two--Fred P. Meader, Wilder B. Neal.

Ward Three--Ralph H. Hall, Elias F. Smith.

 Rogers School.—Winnifred S. Larrabee.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

Enrollment and Attendance.

The average membership in Rochester public schools for the past few years is as follows: In 1901, 1040; in 1902, 1057; in 1903, 979; in 1904 (the school year closes in July), 1072. You can see that our schools are increasing steadily in numbers. The falling off in 1903 was due to much sickness and other causes; that it was only incidental is proven by the fact that the reports for 1904 show not only a return to the numbers of 1902, but an increase as well. It is pertinent to say, in addition, that the reports of the teachers for the month of school ending December 2, 1904, show an average membership of 1137, an increase of sixty-five, which seems remarkable in view of the fact that the age of admission has been raised to six years, which kept out a considerable number of young children. It must be patent to anyone that additional teachers are necessary to care for this increase in numbers of pupils. Many of the tardinesses are due to arrivals on the electric cars, which arrive in winter just a few minutes late for school. The tardiness must be counted, although it can hardly be counted blameworthy on the part of the pupil.

Finance.

By referring to the financial statement, it can be seen that there is a large deficit. This was unavoidable. Not a dollar has been spent extravagantly; many dollars more could have been spent to great advantage. The reasons for this deficit

can be easily explained. Two years ago the school department had a balance unexpended of about sixteen hundred dollars, in consideration of which the City Council reduced the appropriation for that department for the following year by one thousand dollars. Last year, although there was still a balance on the right side, the expenses of the school system were increasing so rapidly that a larger appropriation was needed, but the Council did not restore the appropriation to the former figures. The result is a deficit. The increased expenses are due to the high prices of coal, to the increased cost of school room supplies, and to the incoming of more children who require more teachers and more books and supplies. You will note that the cost per pupil is even a little less than it was last year. The cost per pupil is really the only criterion by which it is fair to judge the cost of the schools. In a previous report I have shown you that our schools cost per pupil the least of any city schools in New Hampshire, which fact ought not to be a source of pride to us. Surely we cannot hope or desire that the cost be further reduced. We must then be prepared to spend a little more. The school membership is increasing, more teachers are an absolute necessity, and better teachers' salaries are demanded by the interests of the school, of the community, and by good business judgment. Not only have we a deficit to make up, but future needs must be considered in the estimate of expense for the coming year.

It is sometimes urged that our schools are already getting their fair share of the taxes—fully a quarter. I would respectfully suggest that our total tax levy is very small when compared with that of other places of our size, hence the school expense, which is a reasonably constant quantity everywhere, is *relatively* large, though *absolutely* small. I would commend to those interested in the finances of the school department the reports of other cities and towns of our class, and a comparative study of the total tax levies of the same towns and cities. Rochester's schools must cost more money or fail to do the best work.

Schoolhouses and Grounds.

Rochester has some fine school buildings, some good ones and some that need improvement. The new high school building, the East Rochester building, the Gonic building, and the old high school building are in good condition for efficiency. The Maple street building is inadequate in regard to seating capacity and is not well heated, is poorly ventilated, and the basements, aside from being entirely inadequate in size, are positively injurious to health. One hundred and forty children use a hall space not more than that of many well appointed residences; rooms intended to accommodate thirty small children are used for forty and even sixty. In my report for 1903, I mentioned the problem that confronted us at Maple street. I now call your attention anew to the same problem. It has now become imperative that you provide some solution of the matter before the opening of the spring term, when there will be an influx of primary grade children. Should you attempt to solve the problem by admitting to the first grade in September only, you would only postpone the difficulty. Probably this will have to be done; but additional room must be had soon. Whether it seems best to your board to enlarge the present building or to erect another building in the close vicinity of the present one, I would suggest that the building committee have in mind the future growth of that locality and the probable demands upon a school plant. As I pointed out last year, it is almost a hardship for those children residing north of Washington street to go to the old high school building. There should be fifth and sixth grades on Maple street. A six-grade school is needed at Maple street to serve the convenience of the upper part of the city and to relieve the old high school building sufficiently to accommodate the pupils from the lower portions of the village.

The School street school is a disgrace to the city. It should give way to a larger and modern building. The grounds about this building ought to be graded. In winter and spring they

are always wet and productive of constantly recurring colds among the children, due to wet feet. In the spring it is not an uncommon thing for the teacher and pupils to wade ankle deep in slush or icy water to reach the building. There should be a house of two rooms at least in this section, so constructed that it could be enlarged easily to a four room building. Children of third grade in this section now have to go to the old high school building, a long distance for some of them and not a very safe journey for small children over two or three railroad crossings, in the opinion of many mothers. I repeat my opinion expressed a year ago that there should be two teachers in this building to teach three grades and possibly four. This arrangement would aid in the relief of the congestion at the old high school building that gives evidence of near approach.

At the old high school building there is one room in use that is poorly lighted. It could be made light, I think by the use of prism glass in the windows and this should be done at once in the interest of the children's eyesight. This dark room is one of the rooms resulting from the partition of the large main room during the past summer. The other room is splendidly lighted.

East Rochester school house needs painting very badly; it should have been painted during the past summer, but the condition of the finances prevented its being done. During the vacation the porches were repaired and the porch roofs were gravelled and tarred. Some piping was done in the basement.

The old style double desks were removed from the Meaderboro school and single desks were substituted.

The Rogers school is fast coming to be what someone has designated the usual country school house to be, "a wayside hovel." The interior is becoming dilapidated, is unsightly, cheerless and unsanitary; the exterior is dreary, dirty and in every way the opposite of what a school and its surroundings should be.

I believe, and I believe that every good citizen believes, that the school and the school grounds should be attractive and as

far as possible an example of cleanliness and beauty to the pupils and the community. I wish that some effort and a little money could be spared to set a little shrubbery and a few plants and trees about the lawns of the school buildings. Our high school lawn might be made very attractive at slight expense and little effort by the addition of shrubs and flower beds. The yard at the old high school building is rather devoid of interest and beauty just now, but a few varieties of trees and possibly some shrubs and flower beds would change the effect immensely. The Gonic school yard is not a thing of beauty, but it could be made more beautiful, I am sure. A little green grass is beautiful to look at and this could be had in a greater or less degree at Gonic and East Rochester by the application of some dressing to the lawns. Our children ought not to be allowed to grow up to feel that any kind of a yard, clean or littered, beautiful or ugly, is all right. The aesthetic conscience must not be hardened by neglect. A keener appreciation of beauty means more beautiful homes in a more beautiful city, which means more happiness and joy in living.

Evening School.

The evening school has not been opened since last February. The term after the holidays was not well attended and the school was closed to save expense. It has not been reopened this fall owing to lack of funds.

The High School.

The high school is prosperous and well managed. The new course of study for the high school recently adopted is working well. The commercial course is well established and serves a useful purpose, I believe. The equipment for this course, however, is insufficient. Two typewriters are made to serve a number of pupils for whom four machines would be too few for the best service. For a detailed report of the high school I refer you to the report of the principal of the school.

Report of Principal of High School.

Mr. Ernest L. Silver, Supt. of Schools:

DEAR SIR:—In compliance with your request I submit herewith the annual report of the high school for 1904.

The enrollment on Dec. 23 was 156 and the membership by classes was as follows:

	1904	1903	1902
I year (entering class)	58	60	75
II year,	33	48	34
III year,	38	26	19
IV year,	27	18	19
	<hr/> 156	<hr/> 152	<hr/> 147

The corresponding figures for the years 1902 and 1903 are added for purposes of comparison.

You will note a slight increase on the membership of one year ago, and it may be added that the same conservative gain may be expected during the coming year. As the city grows, the school will grow, and in about the same proportion.

In order to accommodate this increase, it became apparent during the past year that the best interests of the school demanded the use of another room for purely high school purposes. Such a room was not available at the beginning of the present year and we have made a virtue of necessity by remaining in the present cramped conditions. Although this need is fully recognized by those in close touch with the situation, it may be well to state the relevant facts. At present the high school has, available for recitation purposes, five large rooms with desks, one small room and two laboratories. The laboratories are available only for small classes doing laboratory work. They cannot be used for study purposes. The school then, must generally be accommodated in the five large rooms which have each a capacity of 42 pupils. With a membership of 156, the average number in each room is 31. This is too many. So large a number, however carefully they go

about their work, will produce an atmosphere that is hostile to the best efforts of those studying, and of those reciting. It should be borne in mind, too, that the membership at the beginning of the year is 180, or 36 in a room.

The teaching force of the school has met with one change, and one addition. Mr. A. W. Wing of Philips, Me., a graduate of Bates college, is in charge of the new business branches. Mr. Wing is also a graduate of a well known business school. The school is to be congratulated upon the ability it has shown to retain teachers. An average of but one change a year for five years in a school of 6-7 teachers is doing well.

It is too early to make any extended or detailed comment upon the nature and value of the new program of studies. In general it may be said that it is daily proving its value. I do not refer to the business course in particular, as time alone can place the seal of approval upon that, but rather to the general scheme of electives and requirements. We feel in consequence thereof, an increased sense of responsibility for the success or failure of each. This is true to an extent greater even than we had anticipated.

In the matter of preparation for college, the school is now most favorably situated. Under the new system of certification, we have had eleven pupils enter college and have at hand tabulated and detailed reports upon their work during the first half of their attendance at the various higher institutions. This forms a reliable basis upon which to estimate the grade of work which the high school must offer in order to retain the privilege of certification. Whatever may be said about the merits of this system of certification, the fact remains that New England schools and colleges are committed to it. It would be folly for a school to pursue such a course as to forfeit certification rights. Such forfeiture would mean increased expense and great embarrassment to all pupils entering college, and would doubtless prove the means of debarring many a worthy boy or girl from a contemplated course in college. Examinations are unaccountably difficult for some pupils, and there is reason to

believe that colleges which are sure of their full quota of pupils upon certificate make their examinations difficult. Our course, then, is for the present, obvious. We must establish a reasonably safe standard of preparation and then adhere to it. Meantime the interested public should be fully educated to the necessity of such a course.

The addition of lights to the equipment of the high school building, has made possible a great advance in the social life of the school. This advance has for the most part taken the form of socials attended by pupils. Such functions will always result from the need of money on the part of classes and athletic organizations. Hitherto they have been held in some hall not under school control and hence have not been considered a school function to the extent of requiring chaperonage on the part of the teachers of the school. It is obvious, then, that if they must take place, they should take place under the guidance of school authority. This is best for the school and the individual. Theoretically they are valuable as one of the links that serve to unite the school life to the life beyond the school. In practice there are some serious problems to solve in the social development of school life.

The new building still continues a source of pride. Pupils and officials are to be congratulated upon the success of an evident desire that it shall remain such. So far as the work of the building committee is concerned, there is nothing to be said. It has however been my good fortune during the past year, to visit a number of schools in this state and Massachusetts, and each school, by its wealth of equipment, has impressed me with the poverty of our own. Let me illustrate. The book room has never been adequately shelved, and hundreds of books must be piled upon the floor. This is inconvenient and uneconomical. School property cannot be properly cared for under such conditions. Again all signal bells must be rung by some teacher. This results in inaccuracy and dissatisfaction, besides taking a great deal of valuable time, as the bells are rung 15 to 20 times each day. In so large a

building a time service is all but indispensable. There is as yet no business equipment, and the needs of this new department should receive careful attention. And last of all, there is the ever present need of books, which has been referred to in previous reports. This is not intended to imply lack of liberality on the part of the school officials. Such an implication would be unjust. It is merely intended to indicate what form future liberality should take.

In the policy and administration of the school, I have, at present, no specific recommendations to make. Owing to kindly coöperation on the part of superintendent and school board, the most imperative needs of the school from the standpoint of the principal at least, have been met. I would suggest, however, as worthy of careful consideration on the part of all interested, the advisability of uniting such of the grammar grades as must remain in the high school building to the high school, not only for administration purposes but for purposes of instruction also. Very great advantages are at once apparent from such a union, and I have so far been unable to convince myself that there are any serious disadvantages.

In closing, I desire to give expression to the regret which the teachers of this school, and of the city, feel in the severing of a relation which has been both pleasant and profitable. You carry to your new field of labor our heartiest good wishes, and you leave with us the memory of a faithful and efficient service.

My thanks at this time are due to all others, pupils, teachers, and school officials, who have helped to make the past year one of success and inspiration.

Respectfully submitted,

F. G. GETCHELL.

Drawing.

The financial straits in which we found ourselves this year compelled us to do without the services of a drawing teacher after June. Miss Bunker, who served us two years, laid a good foundation and the grade teachers have worked strenuously and efficiently that the work may not suffer too much while we are compelled to forego the services of a drawing supervisor. Our children do very good drawing and ought to have the advantages of a special teacher. I hope that we may be able to afford a drawing teacher for the coming year.

Music.

We are fortunate to retain the services of Mr. French as supervisor of music. He is a hard-working, efficient teacher and has done our schools great good. He has given the teachers a definite work to do and has supervised that work with the utmost care. I have asked him to report upon the progress he has been able to make during the past year, and I herewith append his report:

Report of Supervisor of Music.

To the Superintendent of Schools:

SIR:—You have kept yourself so constantly and sympathetically in touch with the work in the music department, that I shall be able to report little that you are not already acquainted with. I presume, however, that your object in asking for a report is to supply information to those who may not be as closely in touch with the details of existing conditions as you are; and

it is with this idea in mind that I submit the following report.

The office of music is to appeal to the emotions, or to furnish a medium through which to give expression to emotion. Since it would be impossible for one to give expression to an emotion which one had not already sensed or experienced, the first work in teaching music to children is sense training. Incidentally with the sense training comes the development of the motor element, or power of expression.

The first year is given exclusively to this work, the only reading called for being in a simplified form of tonic-sol-fa. The character of the songs is based on the principles of the "folk songs" and gives expression to emotions and experiences common to child-life. The compass of the tunes is carefully graded so as to develop good quality of tone in the singing, and incidentally form correct ideals in the pupils' ear, and good vocal habits at the very outset.

The staff notation is presented at the beginning of the second year, by a method differing in some important respects from any that have hitherto been employed in teaching music to children. It treats music as a language, and presents its written symbols precisely as is done in the teaching of English at the beginning. I am happy to believe that in adopting this method of instruction an important advance has been made.

It is not practicable to enter into any very extended course of individual training on account of the lack of time. But children are not all born equally developed in any given power. Their differences should be ascertained at the earliest possible moment and the helpfulness of the strong called to the aid of the weak; while the latter are taught self reliance as rapidly and as far as possible. The teacher should not only get acquainted with the individual standing of the members of her class as early as possible, but she should keep in touch with the progress of her pupils. Every pupil of the class should therefore be encouraged and expected to express himself or herself, individually, in an exercise or song, as often as is practicable, and the pupil's standing noted by the teacher; and

while she regards the exercise as a test, the pupil should look upon it as an opportunity to show his musical ability.

It is impossible to interest, to the same extent in any given subject, all individuals. However, the mental attitude is influenced, in no small degree, by the physical. An indolent physical position tends to superinduce an indifferent mental attitude. Only those who are lacking in musical temperament, or are too lazy to be interested in anything, need correcting in this particular. Scholars should therefore be taught to maintain positions of alertness and attention.

In order to secure the advantage of a good beginning, and to permanently utilize those advantages, a carefully graded system is necessary, with materials sufficient to put the system into actual practice. We already have the system, as reported one year ago, but, unfortunately, the books in use between the second and seventh years do not furnish materials sufficient to afford the proper grading. We are able to introduce the new problems, but not to develop them adequately.

When all our hopes for the grades shall have been realized, I hope to see music introduced into the High school as a scholastic subject. In the mean time we must make the most out of our chorus practice that the capacity and size of the school will permit. The scholars are working well and seem to enjoy their music period.

The orchestra in the high school is contributing no small share to our success there.

In closing this report, I desire to express my sense of obligation to you, Sir, for your un-failing co-operation; to the teachers for their loyalty; to the scholars, their parents and the school board for their appreciation and support.

Respectfully submitted,

A. E. FRENCH.

Some Conditions and Problems.

The problem of numbers is one that requires speedy attention. The interests of the pupils are suffering and have been suffering from the over crowding of school rooms. The teacher has been over-worked, over excited by the consciousness that she is expected to prepare for the next grade fifty pupils whereas she would have a sufficient task to prepare thirty. The pupils are poorly prepared and enter the next grade just a little bit behind the standard of that grade. In consequence, the work of the whole year comes hard to them and they enter the next higher grade still more handicapped than they were the previous year or they have to repeat the year's work. If they move on their scholarship suffers, and a few pupils whose scholarship is not up to grade lower the standard of the entire grade. As a matter of fact, the situation in Rochester has reached such a pass that I have seriously considered setting back the entire seventh grade in the high school building for the sake of scholarship. About one-half of the eighth grade should be set back likewise. The teachers are not to be blamed in the least for this state of affairs; the lack of funds is entirely responsible for the condition. Each year we have been compelled to promote pupils from room to room to make room for the incoming classes from below. Had there been funds available for the employment of an adequate teaching corps, many pupils would have been held back where they should have been, and many pupils who needed more careful attention and individual effort from the teacher would have been kept up alright. It is false economy that burdens a teacher with too many pupils. The efficiency of the schooling is sure to suffer a little each year; the loss in the aggregate of the eight years' course is very likely to amount to a whole year, at least. Not only does the pupil lose a whole year's time thereby, but the city has the added cost of educating that pupil one year longer than it should. There should be immediate provision for another grammar grade teacher at the old high school building.

About twenty-five of the sixth grade pupils at the high school building should be transferred to the old building, leaving an opportunity for the demotion of about that number of pupils from the seventh and eighth grades respectively. Such an arrangement would be most wise, I am sure. The additional grammar teacher will be an absolute necessity in the fall and her presence now will enable the other teachers to do far better work and fit more pupils properly for the high school and the eighth grade. Unless this is done the same slighting process must be gone through with and pupils advanced who are not qualified to do the work of the succeeding grade or the high school.

The crowded conditions are not limited to the higher grades. Some of the primary teachers care for forty-five and fifty or more children, whereas thirty is a large enough number. Such conditions, while they last, will prevent the greatest efficiency of the schools. I sincerely hope that your board may have sufficient funds to remedy these lamentable conditions at an early date.

Under the head of school buildings, I have referred to the pressing need of more accommodations at Maple street, and the need of a new building at School street. The Maple street problem must be dealt with at once.

The Eight Year Plan.

For the past three years, I have promoted directly from the eighth grade to the high school. The ninth grade has not been abolished by the board, as many people seem to think. A careful study of the course of study adopted by the board in 1899 will show that the ninth grade work is for the most part a review of the work of the seventh and eighth years. Those pupils who have done good work in the eighth grade, have made good in the high school almost without exception. Those who have not done good work in the eighth grade, have not always done creditable work in the high school. A percentage of pupils will fail in the high school, no matter how many years they have given to preparation. I am confident that eight years is a sufficient time in which to prepare for the high school, provided the work of each grade is done thoroughly well. It ought not to be necessary to spend a whole year to review what has already been taught well. Every week and every year should have its review. In following out the eight year plan we not only save a year's time to the pupil and the cost of a year's schooling to the city, but we are getting into accord with the almost universal plan throughout the country. New England is conservative and many towns and cities, especially in the vicinity of the heart of New England, still cling fondly to the time-honored nine-year plan. But it should be noted that in these cities the work laid out for the ninth year is largely advance work, and in part such work as our schools would hardly seek to copy. I do not think it feasible for us to attempt to teach Latin in our grammar schools, nor do I believe that Algebra has a place in our grammar schools as at present arranged. What book-keeping can be taught in the grammar school aside from simple business forms and practices usually taught in connection with arithmetic can be of little cultural or practical value.

I can see no desideratum in the nine-year plan in Rochester provided the work laid down for the eight years is well done.

Teachers.

The teachers of the city are earnest, and efficient. The standard of ability among our teachers is very high for the most part. It is fortunate for us that it is so. Education is absolutely essential to the perpetuity of a democratic form of government. It is true that an ignorant people may be governed, but only an educated people can govern themselves. A low state of educational efficiency in state and nation imperils republican principles and democratic institutions. The quality of a democracy is determined by the quality of its citizens; the quality of its citizens is determined by the quality of its educational institutions, and these in turn reflect the quality of the citizens. Good schools make good citizens and the best quality of citizenship will desire and will have good schools. By far the most important element in a good school system is the teaching force. How highly important is it then to have and keep good teachers.

We have had many good teachers in Rochester, but we do not *keep* many of them. At the time of writing this, there are but five teachers in our schools who have been with us five years. Such a condition is not desirable. Within two years there have been twenty-eight changes in the teaching force. A great number of the teachers who come to us are inexperienced and hardly become proficient when better salaries induce them to go elsewhere to profit by the experience gained at our expense. It is not too much to say that a teacher is worth to a community nearly twice as much the third year as she was the first year, provided she was inexperienced at first and provided she has the elements of success in her make-up. Those not fitted for teaching by natural attainments or by education will make little progress in many years.

If we would keep our teachers and maintain a high standard in our schools, the salary question must be met squarely and justly. The interests of the community demand it, and that soon. So long as our teaching force is almost entirely new

each year, so long must our schools continue to be embryonic in methods and results. The task of the superintendent in his efforts to adapt, to fuse, and to unify the varying elements of inexperience and ignorance is well-nigh discouraging, when he sees it recurring annually. He gets little opportunity to perfect anything.

The chief argument for increased teachers' wages is that the needs of the community demand them. Surely the training of intellect and character is most important and only the best men and women, the ablest talent, can be good enough to do this work satisfactorily. The quality of the work done is determined by the efficiency and character of the teaching force. In times past the ordinary citizen teacher with but little if any special preparation for her work was thought sufficiently competent, whereas now teachers must have not only a broader education than formerly, but a special training for the work as well. This special training costs money and the trained teacher can not be had on the same terms as the citizen teacher of old. In this age of progress there is need of greater skill in training the future citizens for usefulness, competition is stronger, demands are greater, and the maximum of efficiency in the product of the schools is demanded in the minimum of time. Can any but the best talent, the flower of the community, serve these interests fittingly? But what is the situation?

The unjust and inadequate wages paid to teachers, male and female, are driving from the profession the best talent, and those alone are looking toward teaching as a life work who have less ambition or, in a few cases, those who are imbued with the missionary spirit and a love for the work. Always a great deal of the compensation of the patient teacher must come from a realizing sense of the joy of service in a noble cause, but that is by no means a reason for denying her a living wage. Sacrifice of energy, privileges and comforts for the service of an unappreciative public is not a common trait and is becoming less noticeable as the years pass. Other occupations offer much better inducements to young people, and are getting the more

ambitious and efficient persons. Throughout the entire country it is at present a very difficult matter to secure efficient, trained teachers. We cannot wonder at this condition when we consider the state of wage conditions in the country as shown by reliable and authoritative sources. State Superintendent Henry C. Morrison has collected data bearing on this subject and I venture to quote from him.

"In order to state the case of the nation at large in this matter as definitely as possible, I venture to set forth a few comparisons between the wages of public school teachers and those of other workers. The authorities are the Report of the U. S. Commissioner of Education for 1902 and the Bulletin of the Bureau of Labor on Wages and the Cost of Living, issued in July, 1904. The figures computed from the latter, however, are for the year 1902.

<i>Average weekly wages of all male teachers,</i>			<i>\$12 26</i>
Average weekly wages of hod carriers,			12 99
"	"	machinists, (foundry and machine shop),	14 97
"	"	blacksmiths, (blacksmithing and horseshoeing)	15 50
"	"	carpenters, (building trades)	16 91
"	"	plumbers, (build'g trades)	20 41
"	"	bricklayers, "	25 64
<i>Average weekly wages of all women teachers,</i>			<i>\$9 94</i>
Average weekly wages of women cotton workers,			5 84
"	"	" hosiery and knit goods workers,	6 79
"	"	" carpet workers,	7 34
"	"	" shoe shop workers,	9 51

The figures above cited show the teacher's wages as compared with those workers for whom little preliminary education, beyond that of the common schools, is required. It is presumed

that the great majority of teachers, both men and women, must have at least a high school education equivalent to that of those named in the *following* table. No account is yet taken of normal school and other professional training.

<i>Average wages of men teachers per week,</i>	<i>\$12 26</i>
Average wages of men proof readers, (book and job),	20 30
“ “ compositors, (newspaper),	21 74
“ “ linotype operators, (newspaper),	24 45
<i>Average wages of women teachers per week,</i>	<i>9 94</i>
Average wages of women linotype operators,	
(newspaper),	15 30
“ “ proof readers, (book	
and job),	16 73
“ “ compositors, (news-	
paper),	17 76

“These comparisons are of course unfair to teachers, for the discrepancy is really greater than any figures at present available will show, since the average working year for teachers is but twenty-nine weeks. During the remainder of the year, the average teacher must either find employment in some other work or live upon income derived from other sources than work. It is a fair assumption that the average teacher can not subsist for twenty-three weeks on what can be saved out of a weekly wage of \$12.26 or \$9.94 in twenty-nine weeks.

“The really fair comparison would be that between teachers’ annual salaries and the annual incomes of physicians, male and female, lawyers, engineers, architects, trained nurses and others. The results would doubtless be appalling.”

It can be readily seen that the wages paid to ordinary unskilled labor throughout the country are higher than those paid school teachers of all classes, including the highest salaried classes. Remember that Mr. Morrison’s figures of \$9.94 per week are for the average number of weeks taught, twenty-nine, not for the full number of weeks in the year. The cotton laborer and others may work the year round. Based on the

year of fifty weeks, the \$9.94 becomes \$5.76, a wage lower than that of any unskilled laborer reported. Right in this connection it is interesting to note the weekly wage of our grade teachers based on fifty weeks, \$7.40. Compare this, if you will, with the above list, and mark you this: In making any comparison of wage conditions, it should be borne in mind that the employees of factories and other industrial establishments are earning living wages all the time they are learning their trade, and there is no expense of preparation for skilled service; while the teacher is cut off from earnings all the time she is preparing for her professional career and finds the expense of time and money incident thereto large.

A few additional figures that I happen to have at hand may be interesting. An investigation conducted by state authority in the state of Maine in 1902 showed that 14,595 laborers in ten cotton and eighteen woolen mills received an average yearly wage of \$427.87. In 354 industrial establishments in the state of Pennsylvania in 1901, 150,000 persons received an average wage of \$544.80. In 186 large establishments for the manufacture of cotton, silk and knit goods in Rhode Island in 1900, the average wage paid to 46,220 employees, not including officers and superintendents, was \$376.57. Among the employees were many children. An extensive investigation conducted by the state of Connecticut in 1902 showed that the average wages paid to the employees, not including officers, in 755 of the large factories and industrial establishments of that state were \$458.52.

Thus it can be seen that the average wages paid to all classes of laborers, not including officers and superintendents, in the various cotton and woolen mills of the eastern states range from about \$400 to \$550; but the wages of school teachers of all classes and *including principals and superintendents*, show an average of about \$400.

Anyone who cares to study the data bearing on the question will find that the wages in other occupations are better than those of teaching. Is it any wonder then, I repeat, that the

profession of teaching is not alluring to our best talent? Since unskilled laborers can on the start, without preparation, get more for their labor than teachers can get after years of careful preparation, and since returns from teaching are insufficient for proper living, the wonder is that any efficient teachers are to be had.

Such a state of affairs can be nothing short of ruinous to the best interests of our schools and our American institutions. On the basis of fifty weeks in the year our teachers get \$7.40 per week. Do the best shop and mill operatives get less?

"If our American schools are to be held at, or anywhere near the high water mark, the wages of the teachers must be kept somewhat above those of the ordinary employments to which young people turn, and the wage schedules must be so graded that a good teacher once in the schools will be induced to remain and serve the people with increasing efficiency, instead of leaving the work at the very time when his services are becoming most valuable."

Not only must the country at large enable the profession of teaching to compete financially with other professions and the industries, but the individual community must be able to compete on somewhat similar terms with the communities about. Rochester, for example, must be ready to pay her good teachers as much as the neighboring cities and towns, else she will continue to be what she is at present, a training school for others. In a previous report, I have shown that Rochester pays her teachers less than any other city and less than most towns about us. Two or three times I have had occasion to secure teachers in the middle of the year, and have sought them from some of the smaller towns. In each case, when I have made an offer to the teacher visited, she has been found to be receiving already more than I could offer her or her board have immediately increased her salary to a figure that I could not meet. That towns of two or three thousand population should outdo us in the matter of teachers' salaries seems strange, but it is too true.

I wish to quote again, this time from a pamphlet upon "Teachers' Wages and Cost of Living," issued by State Superintendent Cary of Wisconsin. What is said is just as true of New Hampshire as Wisconsin.

"In the city schools the disparity in the wages of teachers has been far more depressing and far reaching in its effects than is generally supposed. Teachers have been obliged to cut their cloth according to their means and so the public sees and knows little of the real facts in the case, excepting that they appear to be getting just as good schools this year as they did last, and so are satisfied. The city teacher cuts down expenses by cutting off extras in the professional line as far as possible. This means the reading of less helpful books and magazines, less attendance on institutes and teachers' meetings, less of the uplift that comes from a few inspiring weeks at some place of interest and profit during the summer vacation. It often means a less comfortable and less convenient home and so less opportunity to prepare for the duties of the school room from day to day. With all these curtailments, the people have little immediate concern, but the consequences are certain and deplorable. The more spirited among the teaching force are driven from the work into other occupations. Some are compelled to resort to side occupations which divide their usefulness to the school and eventually lead them away from the profession. Many go to other parts of the country where wages are better, and Wisconsin receives the poorer material from other sections. All of these movements take place with such subtlety and quiet that only those who are intimately associated with the various features of the situation are aware of them. Is there any other branch of the public service in which the relationship between the quality and efficiency of the service and the remuneration is so sensitive and at the same time so difficult for the ordinary citizen to appreciate? And yet the children of the state are realizing in their lives all the disparities to successful living which these defects in our school economy entail. There has never been a time at which the people could not have doubled the

salary of teachers with more than commensurate increase in the quality and efficiency of their schools.*****Almost the sole losers in this unfortunate situation are the people themselves, not the teachers. For it has already been shown that the teachers are simply driven to do one of two things, either they cut down those expenses which contribute most to the advantage of the school they teach, or they leave the profession, thus giving place to less experienced and less competent teachers. There is no more deceptive fallacy than that which leads the people to suppose that a cheap teacher is really cheap. The cheaper the teacher, the more expensive he is. *The only economy is in good pay for good teachers, with increasing pay for increasing efficiency and no pay at all for poor teachers."*

To some readers the injustice of the thing may appeal. They may consider it a reflection upon the good name of the community that the teachers are paid anything less than a living wage. They will consider the great number of young men and young women offering the best years of their lives for the service of the public. To begin with, they must be made of better stuff than the ordinary rank and file to brave the life of severe nervous strain, to suffer patiently the stings of criticism, to face bravely the prospects of penury and a long old age of uselessness. But before these must come the years of preparation which often mean much effort and self denial. Year after year they must follow on the same route with scarcely enough to provide the necessities of life, to say nothing of the comforts and luxuries. And when the rainy day shall come, and old age, what then? No position, no pension, no hope.

I believe that the thinking people, when they fully realize the true situation, will demand that justice and mercy be meted out to the faithful, loyal, efficient teacher.

Conclusion.

In this, my last report to a Rochester school board and public, I wish to reiterate my expressions of thankfulness and respect given you in the past. My relations with the school board, teachers, pupils, and the community have been very pleasant for nearly five years that I have been their servant. It is with sincere regret that I leave the schools and people of Rochester, and my best wishes go with them in the future.

Respectfully submitted,

ERNEST L. SILVER.

ROCHESTER, N. H., December 31, 1904.

SCHOOL BOARD, CITY OF ROCHESTER.

Organization for 1905.

Hon. Chas. W. Bickford,	President.
Wm. H. Slayton,	Secretary.

Ward One—John I. Rankin, Charles E. Washburn.

Ward Two—Wilder B. Neal, Henry Elliott.

Ward Three—Elias F. Smith, Fred F. Seavey.

Ward Four—Dr. Ernest Duval, Elihu L. Webster.

Ward Five—John Hanscam, Dr. E. M. Abbott.

Ward Six—N. Thurston Kimball, Dr. John H. Neal.

Standing Committees.

Finance—Bickford, Hanscam, Smith.

Teachers and Salaries—Hanscam, Neal, Bickford.

Music and Drawing—Rankin, Webster, Elliot.

Schoolhouses and Grounds—Hanscam, Kimball, Bickford.

Supplies—Bickford, Neal, Elliott.

Text Books—Smith, Duval, Abbott.

Rules and Regulations—Neal, Washburn, Webster.

Transportation—Kimball, Seavey, Washburn.

Ungraded Schools—Neal, Smith, Duval.

Truancy—Rankin, Seavey, Abbott.

Superintendent of Schools—William H. Slayton. Office in high school building. Office hours: 8-9 and 4-5 school days except Wednesdays.

APPENDIX.

Rochester High School, Class of 1904.

GRADUATING EXERCISES, JUNE 23, 1904, METHODIST CHURCH.

Class Colors—Turquoise Blue and Gold.

Class Motto—Tout Bien, Ou Rien.

PROGRAM.

Overture—"Felicia," *Gruenwald*

Brock & Sayward's Orchestra.

School March.

Invocation,

Rev. John Manter.

Orchestra Selection—"Chrysalis," Romance, *Melville*

Address,

Prof. Arthur J. Roberts of Colby College.

Orchestra Selection—"Danse des Sultanes," *Daniels*

Presentation of Diplomas,

Superintendent E. L. Silver.

Class Ode.

Benediction,

Rev. Henry A. Blake.

GRADUATES.

CLASSICAL COURSE.

Hazel Marguerite Irish.

LATIN ENGLISH COURSE.

Ernest Waldo Bickford,	Philip Raymonde Flanders,
Wayne Albert Giles,	Charles Conant Severance,
Lauris Atlee Weeks,	Lucy Elizabeth Connell,
Grace Rachel Corson,	Sarah Gove Evans,
Mary Luella Goodwin,	Lillian Bertha Silver,
Flora Belle Wentworth.	

ENGLISH COURSE.

James Frederick Allen,	Walter Clyde McDuffee,
Charles Lucius Sibley,	Lena Eliza Sherburne.

PARTIAL COURSE.

Sumner William Watson.

CLASS ODE.

Air—Keller's American Hymn.

Words by Sarah Gove Evans.

Like soldiers standing all armed for the strife,
 Ready to march or to fight or to stand,
 We're waiting here at the threshold of life
 Eager with courage for the captain's command.

Now with the memory of happy school days
 Giving our lives for the truth and the right;
 Let not a heart shrink at the parting of ways
 While gathered here for the farewell tonight.

There will be trials, O captain, be near,
 There will be pleasures, O smile on us then,
 There will be sorrows, yet we will not fear,
 O Thou who hast given Thy life for all men.

Though active service we always may crave,
 Though oft with heartache we're called to be strong,
 Though oft in failure we're called to be brave,
 Yet on our lips shall be found still a song.

Forward, still forward, the summons ring clear,
 And though our lives may be parted here,
 Let us with joy tread life's path with content
 Forever more to the same goal we're bent.

Captain of souls, wilt thou lead on! lead on!
 We will all follow, victory will be won!
 Lead us through sadness and joy without fears,
 Safe to the happy and home-land years.

No School Signal.

Two blasts on the fire alarm repeated once will be the signal for no school.

When sounded at 8 A. M. there will be no school in the forenoon. When sounded at 12.45 there will be no afternoon session. The signal sounded at 11.30 will prolong the morning session of primary schools one-half hour and of grammar schools and high school one hour, at the end of which the schools will be dismissed for the day.

Employment and School Attendance Laws.

CHAPTER 93, PUBLIC STATUTES.

SEC. 10. No child under the age of twelve years shall be employed in any manufacturing establishment. No child under the age of fourteen years shall be employed in any manufacturing establishment, nor in any mechanical, mercantile, or other employment, during the time in which the public schools are in session in the district in which he resides.

SEC. 11. No child under the age of sixteen years shall be employed in any manufacturing establishment, or in any mechanical, mercantile, or other employment, during the time in which the public schools are in session in the district in which he resides, without first presenting a statement of his age from his parents or guardians sworn to before the superintendent of schools, or if there is no superintendent of schools, before some person authorized by the school board of the district in which such child is employed.

And no child under the age of sixteen years shall be employed as aforesaid during the time in which the public schools are in session in the district in which he resides without first presenting a certificate from the superintendent of schools, or if there is no superintendent of schools, some person authorized by the school board, that such child can read at sight and write legibly simple sentences in the English language. And any superintendent of schools, or person authorized by the school board, who certifies falsely as to matters prescribed by this section, shall be fined not less than twenty nor more than fifty dollars for each offense.

SEC. 12. No minor shall be employed in any manufacturing

establishment, or in any mechanical, mercantile, or other employment, who cannot read at sight and write legibly simple sentences in the English language, while a free public evening school is maintained in the district in which he resides unless he is a regular attendant at such evening school or at a day school; *provided*, that upon presentation by such minor of a certificate signed by a regular practicing physician, and satisfactory to the superintendent of schools, or, where there is no superintendent of schools, the school board, showing that the physical condition of such minor would render such attendance in addition to daily labor prejudicial to his health, said superintendent of schools or school board shall issue a permit authorizing the employment of such minor for such a period as said superintendent of schools or school board may determine. Said superintendent of schools or school board or teachers acting under authority thereof, may excuse any absence from such evening school arising from justifiable cause. Any parent, guardian, or custodian who permits to be employed any minor under his control in violation of the provisions of this section shall forfeit not more than twenty dollars for the use of the evening school of such town or city.

SEC. 13. If any owner, agent, superintendent or overseer of a manufacturing, mechanical, or mercantile establishment or any other person shall employ any child in violation of the provisions of either of the three preceding sections, he shall be fined not exceeding fifty dollars for each offence, for the use of the district.

SEC. 14. Every person having the custody and control of a child between the ages of eight and fourteen years, or of a child under the age of sixteen years, who cannot read at sight and write legibly simple sentences in the English language, residing in a school district in which a public school is annually taught, shall cause such child to attend the public school all the time such school is in session, unless the child shall be excused

by the school board of the district because his physical or mental condition is such as to prevent his attendance at school for the period required, or because he was instructed in the English language in a private school approved by the school board for a number of weeks equal to that in which the public school was in session in the common English branches, or having acquired those branches, in other more advanced studies. Any person who does not comply with the requirements of this section shall be fined ten dollars for the first offense and twenty dollars for every subsequent offence for the use of the district.

SEC. 15. The state superintendent of public instruction shall have authority to enforce the laws relating to attendance at school and the employment of minors, and, for this purpose, he and any deputy appointed by him shall be vested with the powers given by law to truant officers when authorized by school boards to enforce the laws relating to attendance at school and the employment of children. And the expenses necessarily incurred by the state superintendent in such enforcement shall be paid, as audited and allowed by the governor and council.

CHAPTER 4, RULES AND REGULATIONS OF SCHOOL BOARD, CITY OF ROCHESTER.

SEC. 13. *Truancy.*—Teachers shall report the names and residences of all truants and of those suspected of truancy, together with the names of their parents or guardians, to the truant officer as early as practicable. They shall keep a record of the names of all truants, which shall be open at all times to the inspection of the members of the board and of the truant officer.

SEC. 14. *Any child between the age of six and sixteen years, having no regular and lawful occupation, and of sufficient health, neglecting to attend some proper school, or remaining*

absent, or playing truant therefrom, shall, upon conviction thereof, be fined not exceeding ten dollars; and in default of payment thereof be committed to the industrial school till the same be paid or he is otherwise discharged; or, instead of such fine, he may be sentenced to said industrial school for a term not exceeding one year.

SEC. 15. *It shall be the duty of the superintendent* to send a copy of sections 14 and 15 of chapter 94 of the public statutes, and sections 13 and 14 of this chapter of the rules and regulations of the school board to every person who he has reason to believe does not comply with the regulations thereof, and report to the committee on truancy the names of all who still fail to comply therewith; and it shall be the duty of said committee to see to the enforcement of said statute and said rules.
